

In the mood for  
good food.  
**GQ Academy**  
customer  
trainings.

**Do you want to have this in your food?  
Of course not. Just as our model on page one.**

By choosing a Bühler plant you already made the decision to own machines which help to reduce the impurities in your raw material tremendously.

Because: Who wants to store this?

Don't waste storage capacity on rotten corn, just sort it and remove it from your supply.

Changing product qualities require appropriate adjustments to ensure the desired cleaning quality over the years.

No plant stays brand new. Unavoidable wear and tear decreases the efficiency of your machine and increases the risk of unexpected downtimes.

We will assist you! Get to know the Bühler machines with customized training which is optimally adapted to your requirements.

# Create your own individual training. You have the choice.

**Concept 1: For Workers**

**Concept 2: For Thinkers**

**Which components would you like to know more?**  
Mark the relevant boxes and your training will be customized.

## Processing systems

**TAS / SMA / GrainPlus**  
LAAB / LACB / LAGA

**Drumsieve**  
LAKA, RCDA, MKZM

**Ultratrieur**  
LADB

**Air cleaner**  
LAIA

## Drying / Aspiration systems

**Dryer**  
EcoDry, EcoClean,  
EcoCool

**Aspiration**  
LCAC, LCBB

## Conveying systems

**Chain conveyor**  
LBCB, RFKG, MNKA,  
LBDA, RNR

**TUBO, tubular push conveyor**  
LBGA

**Belt & bucket elevator**  
LBEB, RGEL, MGEL

**Screw conveyor**  
NFAT, MNSH

**Belt conveyor**  
LBAA / LBAB, LBBA

## Create your own individual training. **You have the choice.**

### In addition...

Feed your brain with extra knowledge!

**Malting & Brewing**  
Everything about beer!
